Firstname LASTNAME — *Affiliation*

Abstract. This is the abstract.

Keywords: key, words, hello.

1. Introduction

This is where the introduction starts.

1.1. Subsection

This is what a subsection looks like. Here is an example, namely example (1). I made it with `linguex.sty`. If you want to make your examples with `expex` or `gb4e` or whatever, you can.

(1)   I am an example   (Hello!)
        Maybe I need two lines.

(2)   Me, too.
        a.   I am (2a).
        b.   I am not.

(3)   De temps en temps je m'ennuie de l'anglais.
        occasionally   I ME.bore of the.English
        'Occasionally I get bored of English.'

(4)   a.   Maintenant, par exemple.
              now   by example
              'Now, for example.'
        b.   I   ara també.
              and now also
              'And now, as well.'

Here are some examples of references in the main text: Montague (1973); Heim and Kratzer (1998). I could also cite them parenthetically (Montague, 1973; Heim and Kratzer, 1998). I did this with `natbib.sty`. Please use `natbib.sty`. Here are some examples of references in the main text: Dowty (1978), Heim and Kratzer (1998). If you want to cite Karttunen and Zaenen's (1984) paper possessively you can. Please note that `natbib.sty` truncates "to appear" (as in Montague, pear) in citations; you must use a hack if you want to cite Montague (to appear).

I could also cite them parenthetically Here are some examples of references in the main text: Montague (1973); Heim and Kratzer (1998).

1.2. Towards the end

For other tasks, you can use pretty much any other package you like, so long as you don't alter the margins, spacing between paragraphs, font, font size, etc. If you have any doubts, please contact:
